

On the Subject of Warning Signs

It's like "Listening" but more hazardous.

DANGER! This module shows a large sign to warn you about a specific hazard. Find the hazard in the table below to acquire two numbers.

To disarm the module push, hold and release the sign at the correct times. The numbers refer to the last digit in the bomb's timer. Columns A and B refer to pushing the sign, columns C and D refer to releasing the sign.

- Use column A if the number of unsolved modules on the bomb is even, else use column B. *(This includes Needy Modules)*
- Use column D if the number of solved modules is divisible by 3 or 4, else use column C.

Doing anything at an incorrect time will cause a strike.

Hazards	A	B	C	D	Hazards	A	B	C	D
General warning	2	5	1	3	Strong magnetic field	3	7	8	0
Flammable materials	8	9	9	3	High noise levels	8	2	5	7
Radiation	8	6	3	6	Shallow water	9	5	2	1
Toxic	2	3	6	0	Fragile roof	4	3	9	4
Barbed wire	7	8	9	2	Slippery floor	9	7	5	3
High temperature	5	0	1	4	Laser radiation	3	7	9	2
Low temperature	4	2	9	1	Oxidising agent	0	1	1	7
Hot surface	1	8	0	7	Danger overhead crane	5	6	4	1
Sudden drop	2	7	5	6	Hazardous to the environment	0	4	0	2
Trip hazard	9	6	3	2	Risk of falling	8	5	6	4
Falling through	5	0	1	4	Deep water	9	2	9	0
Mind your head	8	6	8	9	Danger of cutting	5	4	3	5
High voltage	3	6	4	5	Rotating parts	1	4	9	6
Irritant	5	8	2	3	Falling objects	6	9	4	1
Risk of explosion	5	6	3	8	Battery hazard	9	6	1	4
Biohazard	2	5	1	0	Corrosive	8	7	4	1
Glass hazard	0	6	7	6	Rotating cutter	6	2	1	6
Gas bottles	7	1	0	8	Cameras	0	2	6	2
